

ORWAK APCO 350

The container packer 350 provides an efficient, hygienic and convenient solution to the challenge to take care of the bagged waste in residential buildings with classic wall chutes. The compactor starts automatically when the bags drop down from the chute and results in significant volume reduction. The compacted thrash is fed into an easily attachable container.

**HYGIENIC
COMPACTION**

ORWAK BENEFITS

MORE PRODUCTIVE USE OF TIME

Less time spent on waste handling, more time for your core activities!

MORE SPACE & ORDER

Our compactor rapidly minimize the space the waste takes up, keeping floor space free and tidy.

LESS COSTS, MORE VALUE

More compaction = less waste volume to transport. Fewer transports required results in lower transportation costs and reduced CO₂ emissions. Sorting at source yields a higher quality of waste material for recycling.

WHY CHOOSING THE ORWAK APARTMENT COMPACTOR?

- Saves valuable floor space in your storage area
- Keeps the maintenance area neat and tidy
- Hygienic waste management solution for household waste in apartment buildings
- The volume reduction means less waste to collect and cuts the waste reduction costs

ORWAK APCO 350

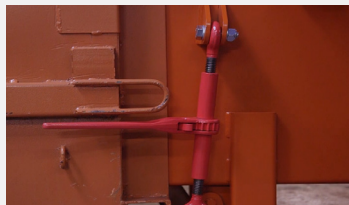

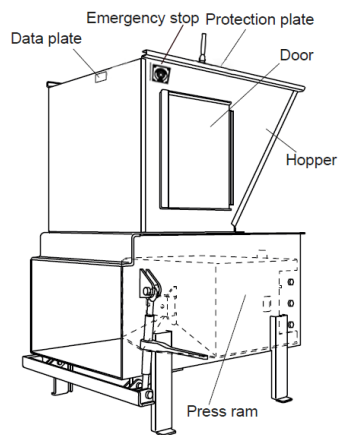

Saves floor space, cut waste costs and keeps the storage area clean

PREMIUM COMPACTION

Orwak's indoor container packer provides premium compaction in big buildings. It is just the right size to fit in your storage/maintenance area and yet large enough to keep up with the compacting needs for a residential building. Make a difference in your building's recycling and trash compaction needs!

AUTO START

The bags conveniently drop down from the chute directly into the hopper of the compactor and thanks to a photocell the machine automatically starts compacting the trash.

Ratchet binder for container release

Close the door to keep the trash in when rolling out the container.

QR code on the compactor for quick access to the instruction video

ORWAK APCO 350 IS OPTIMIZED FOR:

SEMI-DRY WASTE

- General waste

Best suited for dry or semi-dry waste destined for landfill or incineration

THE CONTAINER SOLUTION

The compacted trash is pushed into the attached container. When the container is full, the machine stops to prevent overload. You easily release the container, roll it out and replace it with an empty container.

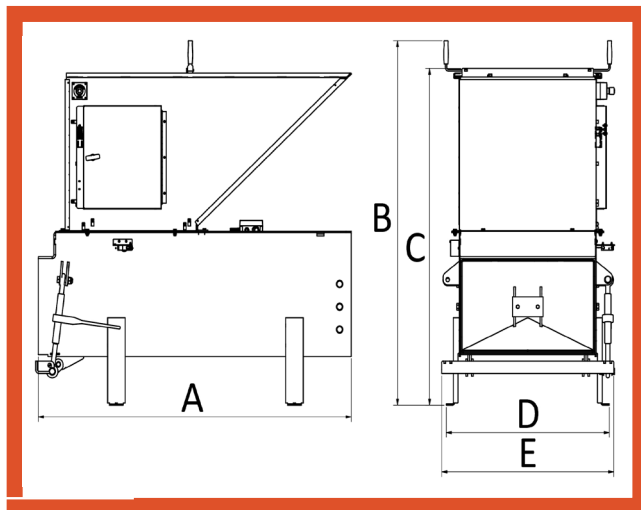

FEATURES IN DETAIL

- Full container indicator
- Replaceable wear plates and positive guides
- Motor overload protection and fused circuitry
- Over pressure protection
- Access door safety interlock switch
- Manual chute cut-off gate
- Electric eye control with time delay
- Off-on key switch
- Operation mode lights

DIMENSIONS

LENGTH (A)	INSTALLATION HEIGHT (B)	HOPPER HEIGHT (C)	CHANNEL WIDTH (D)	WIDTH (E)	TRANSPORT HEIGHT
5' 10"	6'	5' 6"	3' 1"	3' 3"	7' 7"*

*The power pack is placed on top of the machine for overseas shipment from the factory, but it can be removed for local shipping to reduce the total transport height to 6'.

PRESS FORCE	CYCLE TIME	OPERATING CAPACITY	OPERATING DENSITY	CONTAINER	MACHINE WEIGHT	OPERATING POWER
20723 lbs	20 secs	65 cubic yards/h	450-750 lbs/cubic yard	Front or rear loading	1687 lbs	3x208-230 V, 60 Hz 3x440-460 V, 60 Hz
